Sec. 5, Dozen eggs, brown—1st Mrs. A. L. Orvis, 2nd Robt. Marsden.
Sec. 6, Home-made cheese—1st George Remple, 2nd Mrs. A. Arneson.

Domestic Products Class 29

- Sec. 1, Home-cured ham unsmoked—1st Mrs. J. Sanderson.
Sec. 3, Home-cured ham smoked—1st D. Warwick, 2nd Robt. Marsden.
Sec. 4, Home-cured bacon, smoked—1st D. Warwick.
Sec. 5, Home-cured lard—1st Mrs. S. Martin, 2nd Mrs. A. Gibson.
Sec. 6, Home-made soap—1st Mrs. A. Arneson, 2nd Mrs. W. A. Bishop.

Note: In the following classes the prize of "Mrs." is omitted.

Canned Fruits and Vegetables Class 30

- 1 Collection canned vegetables—1st C. P. Snyder, 2nd A. Wade.
4 Collection, canned fruit—1st C. P. Snyder, 2nd J. Sanderson.
5 Collection of Jellies—1st J. Sanderson, 2nd M. J. Whitlock.
6 Canned meat, beef—1st J. Bresden, 2nd P. J. Bellevue.
7 Canned meat, chicken—1st C. P. Snyder, 2nd N. Leitch.

Native-Grown Fresh Fruits Class 31

- 1 Black currants—1st J. Sanderson.

WEDDING

MacArthur-Walker

A very pretty wedding was solemnized in the United Church, Oyen, Wednesday evening, July 31, when Miss Gladys Victoria, eldest daughter of Mr. and Mrs. W. F. A. Walker and Mr. Elmer MacArthur were united in the holy bonds of matrimony. The ceremony was performed by Rev. George A. Steele of Delia, Alberta, uncle of the bride and pioneer minister of Oyen.

The church was artistically decorated for the occasion with plants and flowers and a bridal archway from the entrance to the altar in a color scheme of peach, maize and white green.

The bride and bridesmaids were attired in corresponding shades of silk and georgette with hats to match. As a prelude, "Because" was sung by Mrs. R. Nisbet, after which Mr. Major Eldridge played the wedding march. Mr. H. Sheppard acted as usher to the bridal party. The groom was attended by Mr. Andrew Carr, of Drumheller, and the bride who was presented by her father, was attended by her sisters, Misses Melva and Laura. Ruth Steele made a charming little flower girl and Master Roy Cutlan was ring-bearer. The bride carried a bouquet of Ophelia House and Gypsophila and the bridesmaids each a sheaf of Sweet Peas and Gypsophila. Mr. R. Nisbet sang "Untill" during the signing of the register, after which the wedding party repaired to the home of the bride's parents where dainty refreshments were served to a number of friends.

The popularity of the bridal couple and the esteem in which they are held was evidenced by the many beautiful wedding presents received. Mr. MacArthur was one of the early pioneers of the district and has operated a grocery and confectionery business in town for several years. Previous to her marriage Mrs. MacArthur, was on the staff of Oyen Public School for three years.

On Thursday morning the bridal couple left for an extended motor trip to the Pacific Coast.

Their many friends unite in extending their best wishes for a long and happy married life.

- ers, 2nd Gus Schmidt.

COMING

CLARA BOW in "THE WILD PARTY"

SUGGESTS THAT BRITAIN SINK PART OF FLEET

Washington.—Great Britain was called upon in a statement issued by Chairman Borah, of the Senate Foreign Relations Committee, to sink some of her ships as a means of reaching a parity with the United States.

Borah said England has 59 modern cruisers while the United States has eighteen built or building.

"If Great Britain will follow our example at the Washington conference," he said, "and sink some of her ships and thus come to parity, it will not only save the taxpayer but reduce the incentive to war — for huge armaments are always an incentive to war, party or no party."

"But if we have to build up to parity, it is vastly increases the burden of the taxpayer and augments the incentive to war."

The Idaho senator was a luncheon guest recently of President Hoover, and it is presumed the impending naval limitations conference between Great Britain and the United States was discussed.

London.—The sacrifices entailed by the British Government's latest disarmament move are stressed by the Daily Telegraph, the newspaper pointing out the two cruisers, "Surrey" and "Northampton," the submarine depot ship "Melbury" and two submarines believed to the 1928 program and money had been voted months ago.

Advices from Glasgow are that at least 700 men have been thrown out of employment by the reduction of work on the submarine being built there. The keel of the submarine had already been laid and the frame of the hull was being advanced.

Cotton Strike Still

Far From Settlement

Powerful Weaving Branch Refuses To Consider Wage Reductions

Manchester, Eng. — Lancashire's cotton mill stoppage continues with prospects slimmer than ever for an immediate settlement and return to work. The striking operatives will be the dispute and the card room workers will be the strike against the mill.

The employers proposed still to be to work the striking operatives by the dispute and the card room workers will be the strike against the mill. The employers proposed still to be to work the striking operatives by the dispute and the card room workers will be the strike against the mill.

Meanwhile a section of the British press commented on the serious loss to British industry growing out of the stoppage as a consequence of the opportunity it gave Japan to seize the national trade.

Germany, France and Japan were reported in these quarters as optimistic of the opportunity to seize the national trade. The paper said the French textile mills were working at top speed.

The Express printed an article by an unnamed authority, attacking the obsolete organization of the cotton industry, which the writer said, is still bound by the methods of 60 years ago, absurd under present conditions.

Predicts 300,000,000 Bushel Crop.

Toronto.—Col. Ralph H. Webb, former mayor of Winnipeg, said here that in his estimation the total Western Canada wheat crop would amount to about 300,000,000 bushels. From his sources of information he believed Manitoba would have the best crop for some years and while there will be many lean spots in Alberta and Saskatchewan, other portions of these provinces would show good yields.

Sentenced For Manslaughter

London, England.—Richard Joshua Reynolds, 25-year-old American of the wealthy Reynolds tobacco manufacturing family, was sentenced in old Bailey Court to five months imprisonment without hard labor on a manslaughter charge growing out of an accident last May in which a motor cyclist was killed.

Progress Is Satisfactory

London, Eng.—Recent satisfactory progress toward an Anglo-American agreement on naval limitation has raised the belief in well-informed circles here that the convention on other naval powers in the conversations will not be delayed as long as previously was anticipated.

Adults Bank Robbery

Smithers, B.C. — James Wesley Burke, captured recently as a worse man hunt, has confessed to robbing the Royal Bank here of more than two thousand dollars on July 17. He was committed for trial on a charge of robbery with violence. Practically all the money taken has been recovered.

To Attend Labor Session

Ottawa.—Right Hon. J. H. Thompson, Lord Privy Seal, in charge of the unemployment situation under the Labor Government in Great Britain, has accepted the official invitation of the executive of the Trades and Labor Congress of Canada to be present at the convention which will be held at Saint John, N.B., during the week of August 28.

W. N. O. 1797

Development In Aviation

Vancouver and Halifax May Be Linked By Air Route By 1931

Winnipeg.—Unprecedented development of aviation in Canada and the possibility of the Dominion realizing a transcontinental air mail service, linking Vancouver and Halifax by 1931, was heralded here by Major Gen. J. H. MacBrien, of Ottawa, president of the Aviation League of Canada.

Completing 1,500 miles of a solo flight from Ottawa, the famed Canadian flying "ace" piloted his little Duxmoth to a perfect landing at Eganville, Aerodrome, Winnipeg. General MacBrien is en route to the Pacific coast.

"Progress in Canadian aviation has been satisfactory," said Gen. MacBrien, "and a rapid development is taking place. Commercial aviation is growing steadily in Canada. New mail routes are being opened all the time, new flying clubs are being formed and generally the situation is very promising."

Referring to the establishment of a transcontinental airway, Gen. MacBrien stressed the importance of perfect organization and pointed out that links were already started in Hudson Bay, Peace River, Northern Ontario and Quebec.

"Completion of the service will witness federal being supplied from northern provincial districts such as Hudson Bay, Peace River, Northern Ontario and Quebec," he said, "and eventually the Dominion will boast of the most extensive and enterprising services in the world."

Increase Shown In Infantile Paralysis

Warning Sent Out From Ottawa To Guard Against Outbreak

Ottawa.—Telegrams sent forward from Dr. J. A. Anson, deputy minister of health, to the provinces advising that returns showing an increase in infantile paralysis and warning them as to the best method to be adopted should the situation become acute.

A "blue book" is also being rushed through the Government printing bureau and will be widely distributed explaining the disease and how to combat it in the light of recent developments in the disease.

The book, "Infantile Paralysis," written by Dr. Helen MacMurchy, will be issued under instructions from the Department of Health, of the Dominion and National Health.

Some three years ago infantile paralysis was prevalent in California and other Pacific Coast states. British Columbia was not seriously affected.

In 1927 it spread to Alberta, where there were 354 cases. Last year it reached Manitoba where there were at least 400 cases. The increase noted is in Ontario. The department does not wish to frighten the public, but it does wish to advise them of the disease.

To Form Canadian Geographical Society

Will Aim To Make This Country Better Known To Canadians

Ottawa.—A national body of directors has been elected as a first step in establishing the Canadian Geographical Society aimed at making his country better known to Canadians and to those outside the Dominion. The society intends to issue a magazine.

The directors are: Dr. W. B. Brock, University of British Columbia; Dr. R. C. Wallace, president University of Alberta; Dr. W. C. Murray, president University of Saskatchewan; Dr. J. W. Darro, managing editor, Manitoba Free Press; and Dr. Charles Cunnell, Deputy Minister of Mines.

W. N. O. 1797

Replies To Critics

President Hoover Feels Justified In Postponing War On Cruisers

Washington.—The agreement between the United States and Great Britain looking to complete equality in the strength of their navies is held out by President Hoover as an answer to critics of his decision to postpone war on the three cruisers laid down in navy yards next fall.

Quoting our naval authorities as regarding parity with Great Britain as a complete defence of the United States contingency," the president has taken exception to set forth the importance he attaches to the London agreement in a letter replying to criticisms of cruiser postponement action, by Paul V. McNutt, national commander of the American Legion.

WESTERN PORT IS LEADING IN GRAIN SHIPMENTS

Ottawa.—Vancouver leads the country in grain export with a value of \$4,542,651, bushels passing through the port up to the end of the first six months of the calendar year, commencing June 1, according to figures compiled by the harbor commissioners for the port. Montreal exported 42,549,140; Saint John, 22,220,841, and Quebec, 3,587,273 bushels of grain. No exports of this commodity passed through St. John in May or June, the opening of navigation resulting in a transference of the business to Montreal, whose figures for the year begin with the month of May.

The volume for Halifax is not available, but is known to be considerably greater than last year. Grain from the United States furnished more than fifty per cent. of St. John's exports, American exporters shipping 12,281,939 bushels, against 10,341,064 bushels Canadian grain. This quantity of the American commodity was greater in the first four months of the current year than in the whole of 1928.

Last calendar year Montreal shipped 21,269,379 bushels, of which 148,299,958 was Canadian grain and 62,695,421 American. Vancouver shipped 97,250,548 bushels, all Canadian grain. Vancouver's exports increased by 50,233,521 bushels over 1927 and Montreal by 16,427,465 bushels.

To Locate Beacon Station

Depot To Be Established For Airplane Pilots Near Brandon

Brandon.—Federal authorities have decided to locate a beacon station for the guidance of airplane pilots one and one-half miles east of Forrester, A. D. McLean, of Ottawa, and C. Taylor, of Regina, members of the federal aviation board, concluded the preliminary arrangements here this week. Two men are to be stationed at the depot, one for day and the other for night duty. It is understood that the closest beacon station to the west will be Brandon.

CELEBRATE DOMINION DAY IN JAPAN

**Making Secret Trip
In Moth Airplane**

Believe Machine Going North For Northwest in a moth plane is underway with Capt. W. V. Thorbeck, of Dominion Express' aerial staff, at the controls. The flyer hopped off from here for Lac La Ronge in northern Saskatchewan. While the aviator refused to discuss his trip, it is stated in mining circles that the machine will be taken into the far North for mineral exploration purposes.

If successful, the venture will likely set a new Canadian record for light planes of the moth biplane type. Most of the country over which the machine is flying is remote from habitation and a forced landing would place the pilot in grave danger.

Will Check Liquor Runners

Ottawa To Ascertain Whether Canadian Exports In Traffic

Ottawa.—A check-up is to be made of the liquor running out of the Canadian border to the department of national revenue to ascertain just what number, if any, engaged in the traffic are Canadians. This will be done to enable the government to reach a conclusion whether there is a sufficient number to make it worth while introducing legislation in the next session of parliament to prevent citizens of this country from obtaining clearances for liquor going to the United States.

The recent statement of Hon. W. D. Esler, minister of national revenue, announced that if there was any considerable number, legislation would be introduced.

Two Killed By Explosion

Metrol and Blown Down First Into Air

Trull, B.C.—Two men were killed almost instantly and a third injured when an acetylene gas tank exploded in the acetylene burner shop of the Consolidated Rubber plant here.

The explosion threw metal 200 feet into the air. The tank was seen to that height and came crashing down through the roof of the gate house, doing damage there.

Tax Receipts Larger

Ottawa.—Income tax receipts for the first quarter of the present fiscal year (ending June 30) totalled \$5,337,470 over the corresponding quarter of 1928, according to the Minister of National Revenue. The gain is attributed to larger incomes received and to more strenuous efforts in the collection of the taxes.

HEADS ONTARIO MASONS

Edmonton Judge Holds Court At Alkavik

Alkavik, N.W.T.—A verdict of guilty of manslaughter was returned in the case of Okchika, Eskimo, by a jury at Alkavik, recently, before His Honor Judge Dubuc, of Edmonton. The trial was held at Alkavik, in the Northwest Territories, with judge and jury.

Okchika, the Bathurst Inlet Eskimo, was found guilty of murdering Okouk, another Eskimo, in the fall of 1927.

The jury considered for two hours and brought in a verdict of manslaughter, through their foreman, Dr. A. Trussell. Okchika was sentenced to one year's imprisonment at Herschel Island.

This is the end of this year's judicial party's journey to the north to bring to the Eskimos two thousand miles from Edmonton that British fair play and justice for which the British empire has fought through out centuries.

Edmonton Judge Holds Court At Alkavik

Travels 2,000 Miles To Teach Eskimo He Broke The Law

The gain is attributed to larger incomes received and to more strenuous efforts in the collection of the taxes.

Canada's Consumption

Of Gasoline Mounting

New Record Made Last Year With 475,000,000 Gallons

Montreal.—Canada consumed about 475,000,000 gallons of gasoline last year, according to an estimate made by The Financial Post. This is a record figure, and exceeds any previous year's consumption by from 20 to 25 per cent.

Five years from now Canadian consumption of gas will probably top the billion gallon mark, so rapidly is the consumption of this all-important product increasing. This year's consumption will probably be in the neighborhood of 570,000,000 gallons, for not only are automobile registrations increasing currently at 14 to 15 per cent. per year, but the use of tractors and gas-burning machinery on the farms, the increasing tourist traffic, a higher mileage per car and the introduction of aeroplanes, all have their part in swelling our annual gas bill. The increase is significant in view of the tremendous investment interest in the gasoline business.

Pool Payment Of Forty Million On 1928 Crop

Winnipeg.—Nearly \$40,000,000 is being distributed as a second interim payment on wheat and coarse grain by the Canadian Wheat Pool. The basis of the wheat payment is 2 1/2 cents per bushel No. 1 Northern, 1 1/2 cents on No. 2; 2 1/2 cents on No. 3; 1 1/2 cents on No. 4; 16 cents on No. 5; 8 cents on No. 6, and 7 1/2 cents on feed wheat.

Barley is paid in the same manner on other grades, varying from as high as 34 cents and 36 cents per bushel on one or two grades, down to 16 cents per bushel on the smallest parcels.

Interim payments on Durum wheat, No. 1 Amber Durum, 15 1/2 cents on No. 2; 12 cents on No. 3; 13 1/2 cents on No. 4; 14 cents on No. 5; 8 1/2 cents on No. 6, and 14 cents per bushel on feed Amber Durum. Last year the Pools paid out a new policy of adjusting all proceeds and making deductions for carrying charges, etc., from the second interim payment, and this course has been followed this year.

As a result, the final payment, which will be made at the end of the crop year, will be a flat payment on all grades.

That making the above announcement, Dr. R. Ramsay, general manager of the Canadian Wheat Pool, made the following statement regarding the interim payment on grade six and feed wheat.

"Pool members who delivered wheat of these grades will remember that when a new reduction was made in the initial payment last fall, from one dollar to 85 cents per bushel a reduction was made to members delivering the lower grades to meet a very difficult situation. A larger proportion of the price of their grain was paid than in former years; for while the drop in the initial payment on the top grades was 15 cents below the previous year's basis the drop on No. 6 and feed wheat was only five cents per bushel. Prices of the lower grades, therefore, did not decrease from the previous year to prices in the initial payments, in the same proportion as did the higher grades, even in the face of the very heavy deliveries of these lower grades which the Pool received."

The first interim payment on the 1928 crop was made by the Wheat Pool on March 1, last, when a flat payment of 12 cents per bushel was made on grades one to feed, with the exception of grade No. 6, on which the payment was 10 cents per bushel.

An interim payment amounting to over two and a half million dollars is also being distributed by the Coarse Grains Pools of Manitoba and Saskatchewan. An interim payment of 10 cents per bushel on 2 C.W. oats brings the Pool payment to the present to 55 cents per bushel, and 11 1/2 cents payment on 3 C.W. oats brings the payment on that grade to 8 1/2 cents per bushel. The interim payment on barley is 7 1/2 cents per bushel, bringing the total to date on 3 C.W. barley up to 67 1/2 cents. The interim payment on flax is 34 cents per bushel, No. 1 N.W. bringing the total to date up to \$1.98 per bushel. Interim payments on rye are 9 cents per bushel for Nos. 1 and 2 C.W., 9 1/2 cents for 3 C.W., and 10 cents for 4 C.W. oats are estimated at 82 cents per bushel for Nos. 1 and 2 C.W.

LITTLE TROUBLE FROM ANTI-WAR DEMONSTRATIONS

London, England.—The anti-war demonstration sponsored by Communist organizations throughout the world passed peacefully and without large and apprehensive forces of troops police in the capitals of Europe with little work on their hands.

The most serious disturbance reported was in Canton, China, where martial law was declared for the day after grenades had been thrown in a government factory.

Although such meetings as were held in European centers passed off quietly, for the most part under dedicated police observance, there were scattered clashes with the authorities and several scores of persons were added to those already in jail.

Gathering under the slogan of "War Against War," Communists over the entire Soviet Union took part in the demonstrations, which also marked the 15th anniversary of Russia's entry into the world war.

Hundreds of thousands of persons filled the streets of Moscow in long parades led by brass bands and numerous Soviet troops.

Demonstrations on a large scale were held in Moscow, Leningrad, Khar'kov and at other cities at which resolutions were adopted.

The danger of a new war and pleading support to the government's policy of peace, a resolution passed at the Moscow gathering protested against the "attitude of the British Government in the Chinese Whampoa case."

France, whose Communists had made the most extensive preparations, enjoyed a comparatively untroubled day. About 100 persons were arrested in the Paris area where about 20,000 troops were on guard at all police headquarters and in the factory suburbs. Police raids continued late into the night.

Aeroplane flew over the city watching for demonstrations but only in the suburbs, where 100 workers at the Citroen plant rioted and fired on a train car, was there trouble. The riot was quickly halted.

At the front of the interior, and Jean Chippa, prefect of police, stated that the day was calm with only minor and isolated disturbances. Several attempts at demonstrations were made, but the provinces were halted by French soldiers, and Paris police seized tracts inciting Communists to stage a general strike on the boulevard.

A number of German cities and 30 Communists were arrested in Berlin where two members of the police guard were slain with knives.

Will Check Liquor Runners

Ottawa To Ascertain Whether Canadian Exports In Traffic

Ottawa.—A check-up is to be made of the liquor running out of the Canadian border to the department of national revenue to ascertain just what number, if any, engaged in the traffic are Canadians. This will be done to enable the government to reach a conclusion whether there is a sufficient number to make it worth while introducing legislation in the next session of parliament to prevent citizens of this country from obtaining clearances for liquor going to the United States.

The recent statement of Hon. W. D. Esler, minister of national revenue, announced that if there was any considerable number, legislation would be introduced.

Two Killed By Explosion

Metrol and Blown Down First Into Air

Trull, B.C.—Two men were killed almost instantly and a third injured when an acetylene gas tank exploded in the acetylene burner shop of the Consolidated Rubber plant here.

The explosion threw metal 200 feet into the air. The tank was seen to that height and came crashing down through the roof of the gate house, doing damage there.

Tax Receipts Larger

Ottawa.—Income tax receipts for the first quarter of the present fiscal year (ending June 30) totalled \$5,337,470 over the corresponding quarter of 1928, according to the Minister of National Revenue. The gain is attributed to larger incomes received and to more strenuous efforts in the collection of the taxes.

The photograph here shows a scene at the new Canadian Legation in Tokyo, Japan, on Dominion Day, when celebration, its first public function, were conducted in the grounds and the Canadian flag was officially raised for the first time in the Orient.

Protected Against Fruit Pests

Prohibits Imports From Infected Area Of Florida

An order is issued absolutely prohibiting the importation into Canada of non-citrus fruits or other plant products from the sections of the State of Florida, where infestations of the Mediterranean Fruit Fly have been found. Shipments of these products from all other parts of Florida entering Canada must be accompanied by a certificate of inspection signed by a duly authorized officer of the United States Federal Department of Agriculture. This certificate must state that the contents of the shipment were grown in a non-infested area.

The Mediterranean Fruit Fly is an important enemy of citrus fruits, and attacks other fruit crops and vegetables. The Dominion Entomologist of the Federal Department of Agriculture, following the situation elsewhere, the infestations of this fly in Florida during the past few months have caused more anxiety than any other insect, and already sums amounting to nearly \$4,500,000, have been set aside for control purposes. All shipments of plants and plant products entering Canada from Florida are being closely watched by inspectors under the Destructive Insect and Pest Act.

England To Import Hay

But Saskatchewan Farmers May Have None To Sell

Saskatchewan's 1929 hay crop will not be a ready market in England and Wales, according to intimations received by W. W. Waldron, market commissioner of the provincial government. Quoting from an article by Harrison Watson, based upon the hay crop outlook in England and Ireland, it was pointed out that poor crops had been realized there in 1927 and 1928, and there was an estimated shortage for 1929.

The article pointed out that the deficiency in the hay crop was made more serious by the fact that the reserve crop of hay had been entirely utilized. However, poor crop prospects for Saskatchewan point to the fact that the local hay crop will be required at home.

The first cut in the old country gave the farmers just half a crop, according to the report, and in the second crop it is estimated but 25 per cent. of an average crop will be realized. The report states that it is certain that the United Kingdom will have to import hay.

According to present conditions it appears that the Saskatchewan farmers will be unable to take advantage of this ready market for their produce.

The British Empire

An attempt will be made to unite for a common purpose races which are scattered all over the world, whose peoples are different in creed, in color and in traditions. Premier T. B. Egan, of New South Wales, said in addressing the Canadian Club at Vancouver. "It is an effort to combine two apparently inconsistent ideas," he continued, "the idea of perfect individual liberty united to a single Empire purpose for the good of the Empire as a whole."

Will Attempt To Save Billion

An attempt will be made to save the \$5,000,000 in bullion sunk off Brest, France, in the liner Egypt during the World War. An Italian company which salvaged the Belgian steamer "Elizabeth," also a war victim, will have charge. The latest German diving outfit, which enables divers to work for several hours at 200 fathoms, will be used.

Cut flowers set in a draft will soon wilt.

"Don't you speak to Smith now? You greeted him very coldly!" "It is he who is cold with me ever since I borrowed 150 from him."—Montague, Charlier.

N. N. U. 1797

Aligators Alarm Bathers

Two Five Foot Snappers At Large In The Ottawa River

Luna Park, the "Little Sunnyside" of Ottawa, has been called off on account of alligators.

The park imported 30 alligators from the swamps of Florida and while they were being unloaded at the aquarium in the park, two five-foot saurians got away and slipped into the Ottawa River.

Swimmers who stroll by the river in the moonlight have been warned not to ask the girl friend to sit on a log and watch the moon. The log may open up and cheer off a leg.

When the alligators arrived at the park they were all muzzled. The park attendants had never before been called to act as valet to an alligator and so transferred them to the tank by grabbing a tail and swinging them over.

One was alligator about 30 years old got some of his trick teeth to work and chewed off his muzzle. Then he chewed the Ottawa of a nail and ended up by chewing a leg of another.

Joe Charlier, who was conducting the personality conduct trial of the alligators had switched five into the tank and was returning for the night when he was bitten on the leg and disappeared in the water. Joe went into executive session with himself. The alligators were not bilingual but they move at him in the alligator language. They hissed at him. Joe backed up.

The alligators made for the wide open spaces of the Ottawa of a nail and ended up by chewing a leg of another.

Farmer Knows No Hours

Has To Stay On Job Until Work Is Finished

In his independence, the farmer's independent existence, published recently in the "Daily News" League News, the Rev. A. Ritchie Low plays fast and loose with syllabics in the farmer's farming provides a man with a steady state. "He has all he can do right at home." But read two sentences further on: "He is master of his own time. He determines when he shall get up and what time he shall quit." What an impatient world demands to know, is how to hold a steady job without relinquishing one's mastery of time. The deklhand on the submarine, the designer of helicopters, have jobs that bring considerable leisure. But if the farmer quits before the cows are milked and the stock fed, he is—no farmer!

The glowing peasant cited unaccountably overlooks a new and most elastic system of accounting that has suddenly transferred the farmer's life into one of affluence. Suppose, for example, that at the close of the year a farmer finds that his income has been \$5,000 and his business expenses \$5,000. He may completely cast down to discard that he has toiled an entire year for \$500. According to the latest discoveries of scientific management, however, it is now recommended that he add to his income an arbitrary figure for aesthetic satisfaction. Add \$5,000 worth of aesthetic satisfaction to \$5,000, showing a fine net profit of \$5,000. That would make farming seem worth while.

Has Best Of Precedents

The minister who in seeking a larger attendance at his church during the spring and summer season, promised that his sermons would be as short that the entire morning service would last only one hour, may have shocked some of the more conservative members of his parish. But he has the best of precedents. The "Sermon on the Mount" can be read easily in much less than half an hour.

Adds To Population

What is said to be the largest household ever to move into Canada, arrived at Quebec in the persons of 73 people by the name of Amos, all related. The oldest member is 80 years of age and the youngest three. Twelve distinct families make up the group which comes from Sweden. All were bound for Western Canada.

Low Bus Fares In China

Bus owners of Harbin, China, have adopted modern methods by combining, and the association now controls 116 vehicles and pays the city an annual tax of more than \$16,000. The fares have been fixed at from two to five cents, according to the distance, within city limits.

Eighty-four and Eight

What's In A Name

Shakespeare To The Contrary It Sometimes Means a Lot

The citizens of the ancient town of Tremblant, in Norway, are up in arms against a proposal to change the name of the place to Stabroe, under which it was known during the Middle Ages. Ninety per cent. of the population are opposed to the proposed substitution, and the municipal council has sent a protest to the National Assembly voicing their protest and threatening to refuse to abide by the change, if it is made over their protest.

The old, old problem is again involved: "What's in a name?" Well, there is a good deal more in a name, if we may believe some expert witnesses, than Shakespeare thought. While it is true that a rose by any other name would smell as sweet, it is also indubitably correct that if roses were advertised as onions at \$3 a dozen, there would be a strikingly limited sale of them. Still, the passion for changing names persists, and it is by no means confined to places. Publishers in the United States seem to find it well-nigh impossible to contemplate the publication of a novel from the other side unless they change the name. Their argument is a name that intrigues the public imagination or stirs the public curiosity is much more likely to sell a book than anything else. They might be right.

In Canada we have instances of the names having been changed, and the change does not seem to have any harm. But it should surely be left to the particular community to decide to change them.

Canada honored and commemorated the names of the first two men to accomplish a non-stop journey across the Atlantic, when Brig.-Gen. A. H. Bell, Officer Commanding Military District No. 2, Ottawa, christened two Royal Canadian Air Force "bliskin" pursuit planes at Camp Borden, naming them the Sir John A. Macdonald and the Sir Arthur W. Brown.

The new channelling and canning plant of Bulman's Limited, is nearing completion at Vernon, B.C. It is ultra modern in the treatment of fruits and vegetables and will have a maximum capacity of from 35 to 40 tons per day. One hundred and fifty employees will be needed when the new plant begins operation, probably early in August.

Leather dressing was one of the most important trades among the ancient Egyptians, and at Thebes, in the days of the city's glory, a special quarter of the city was set apart for the tanners.

The man with the pull is mightier than the man who gets pulled.

THE CELEBRATED BAD BABY

No. 15, The Bad Baby—130 yards, Par 3.

There is no place to go here except the green. Everywhere else the spolia trouble with a capital 'T' while it is the shortest hole on the Jasper Park Lodge Golf Course, it is one of the hardest, and many a hope for high honors is sure to be broken here during the Canadian amateur championships, which will be played August 19-24, and the Silver Toteum Polo Tournament, September 7-14. The tee, fairway and green are all shown in the upper photograph and below is a sketch to scale, showing the hole in detail.

What's In A Name

Shakespeare To The Contrary It Sometimes Means a Lot

The citizens of the ancient town of Tremblant, in Norway, are up in arms against a proposal to change the name of the place to Stabroe, under which it was known during the Middle Ages. Ninety per cent. of the population are opposed to the proposed substitution, and the municipal council has sent a protest to the National Assembly voicing their protest and threatening to refuse to abide by the change, if it is made over their protest.

The old, old problem is again involved: "What's in a name?" Well, there is a good deal more in a name, if we may believe some expert witnesses, than Shakespeare thought. While it is true that a rose by any other name would smell as sweet, it is also indubitably correct that if roses were advertised as onions at \$3 a dozen, there would be a strikingly limited sale of them. Still, the passion for changing names persists, and it is by no means confined to places. Publishers in the United States seem to find it well-nigh impossible to contemplate the publication of a novel from the other side unless they change the name. Their argument is a name that intrigues the public imagination or stirs the public curiosity is much more likely to sell a book than anything else. They might be right.

In Canada we have instances of the names having been changed, and the change does not seem to have any harm. But it should surely be left to the particular community to decide to change them.

Canada honored and commemorated the names of the first two men to accomplish a non-stop journey across the Atlantic, when Brig.-Gen. A. H. One hundred and fifty employees will be needed when the new plant begins operation, probably early in August.

Leather dressing was one of the most important trades among the ancient Egyptians, and at Thebes, in the days of the city's glory, a special quarter of the city was set apart for the tanners.

The man with the pull is mightier than the man who gets pulled.

Fleshy Annual Pastures

Found Very Satisfactory For Sheep, Swine and Cattle

The principal use of fleshy annual pastures in Canada, such as rape, kale and cabbage, as yet, is as a pasture in the winter months. It has been found quite satisfactory for sheep, swine and cattle, principally young stock, or growing steers. Grown in poultry runs, these crops also constitute a satisfactory free-range food for most kinds of poultry. It is claimed that animals put on weight on rape require a greater amount of salt than usual, and that this should be freely supplied.

In the instance of cattle and sheep there appears to be some danger of bloating unless precaution is exercised to prevent this. Growers of these crops claim that if the animals are not allowed to begin when hungry, especially when the plants are wet with dew or rain or frost, the bloating may be entirely avoided. Once accustomed to eating these crops little danger of bloating exists. According to the pamphlet, No. 7, "Fleshy Annual Pastures in Canada," available from the Publications Branch of the Department of Agriculture at Ottawa, instead of being utilized as a pasture the fleshy annuals under consideration may be grown and fed directly to the same types of animals. Dairy cows may also be included in this category for milking purposes, but good judgment must be exercised to the time of feeding if undesirable odors are not to affect the quality of the milk.

Any of the three crops are also greatly relished by poultry and could be much more widely fed in the poultry house. Because of the fact that the varieties of both rape and kale may be planted probably quite late in the autumn, they are frequently recommended as aids in eradicating weeds. The land to be cleaned may be ploughed early and cultivated until a later part of the season. The self results in the destruction of large numbers of weeds. Either rape or kale may then be sown, and as they grow, the weeds are killed. The growth of weeds will be largely prevented by shading.

Body Lice In Fowl

Readily Controlled By The Use Of Powder Which May Be Easily Obtained

Body lice in fowl are very easily controlled by the use of a powder of which there are many on the market and which are dusted into the fluff and underneath the wings, or, in the case of turkeys, under the tail. As the blue ointment, is very convenient to use. A piece about the size of a small pen is rubbed beneath the wings and underneath the tail. It is then applied to your local druggist who you wish to use the ointment for and he will make it the proper strength. Blue ointment should be used on setting hens as it will destroy the germs in the eggs. George Robertson, of the Agricultural Branch, Department of Agriculture, Ottawa, says of all the many varieties of vermin that infest fowl, Red Mites are the most troublesome. Unlike the ordinary hen house, they are not a rule, found on the fowl, neither are they killed by dusting, as the ordinary body lice is. These pests breed very rapidly, especially during the hot weather, usually in cracks containing filth or in dirty nesting material. They are not red in colour as is popularly supposed, but grey; it is only after they have come into contact with the fowl and have become mixed with blood that they appear red. The young mites are white and have only six legs, but after casting their skins, which they do several times, they are eight legs. They are able to live and reproduce for months without animal food, the first food of the young probably being filth or decayed wood. They thrive best in dark, dirty houses, and have been found to exist in houses the following season after the fowl have been removed. The circular gives full particulars as to the control of mites and the best disinfectants to use.

Lucky Taxi Driver

Andy Williams, taxi driver at Picton, Ontario, was paid \$100 by an American tourist for a 50 cent ride. The man and two friends arrived in Picton on a big yacht. They wanted to find the post office. The fare was 50 cents. "He handed me a \$100 bill," Williams relates, "I said I could not change that. 'Oh, that's all right,' he said. 'Take it and take a holiday.'"

The sale of inflammable X-ray films has been prohibited in New York state.

New Settlers Need Sound Education

Practical Subjects Should Be Part Of School Curriculum

"A sound education is the thing that matters for the intending immigrant," is the dominant note of the report read at the meeting of the British Association for the Advancement of Science by a committee that has been considering the educational training in secondary schools for overseas life. The chairman of the committee is Sir John Russell, of the Rothamsted Experimental Station at Harpenden, England.

"But no education is sound that does not provide some handwork, especially for those who can learn better through practical methods, the report said.

In concluding its report the committee stated the chief conclusions to which their enquiry had led them, as follows:

"When properly worked, the introduction of studies on soil, the growing plant, the management and utilization of the soil and the broad outlines of agriculture, besides giving boys and girls the kind of practical training necessary to equip them not only for life overseas but for life generally, has been found to be the standard of attainment in other subjects.

"Institutions for the school certificate should be modified so as to give due credit to practical training. There is need for a continual extension of the whole subject of school curricula with regard to the incorporation of practical work suitable for different types of school—urban as well as country.

Water Glass As An Egg Preserver

Five Per Cent. Solution Has Given The Best Results

The well known preservative water-glass, chemically known as silicate of soda, is readily obtainable at druggists and grocers, being sold in liquid and solid forms. It has been extensively experimented with, using solutions varying in strength from 10 to 40 per cent., i.e. 2 pounds to 10 pounds per 10 gallons of water; in our investigation a 5 per cent. solution has given better results than stronger solutions. It is readily soluble and has no special directions for preparing the preservative solution.

The results from "water-glass" have on the whole been very satisfactory, but as already stated we consider lime-water the superior preservative—the eggs, on breaking, showing less discoloration of the "whites" than more globular yolks.

Certain essentials necessary to good results are that perfectly fresh eggs only should be used. That the eggs throughout the whole period of preservation should be completely submerged. Do not take them out of the solution until required for use. That the eggs should be stored in a cool place. A temperature of 40 degrees to 50 degrees Fahrenheit. It is undoubtedly materially assists towards retaining good flavour, or, put otherwise, in arresting that "rotten" so characteristic of packed eggs.

Nothing To Show

Elderly Clerk: "I don't like this new fashion of the young men going without hats."

Friend: Why not?
Clerk: In the days of long ago, when the chief wanted somebody who was not in the office, one would say: "He must be about—there is his hat; but now there is nothing to show."

Telegram Service For North

The tentacles of civilization are reaching into the northland. The department of public works has called for tenders for the clearing of a right-of-way for a telegraph line from Hill to Hill in the Cross. These places are in the far north of Saskatchewan, miles beyond ordinary civilization.

"And I came here because they said the water banished rheumatism."—Gutierrez, Madrid.

THE FRIEND OF LOVERS

Few people have heard of Mrs. E. M. Gliner, but 33 millions daily read the advice of Dorothy Dix. Mrs. Gliner's pen name, whose photograph, shown above, was taken recently during her stay at

the Banff Springs Hotel. She was on her way from New Orleans, her home, to Vancouver whence she sailed for a trip to Alaska aboard the Canadian Pacific steamer Princess Charlotte.

Protect your machinery

Sun, rain, frost and snow play havoc with machinery, and all implements should be properly housed. Investment made is not used to be elaborate and can be erected at low cost. You will save money by saving your machines. It is true economy.

About Town and Country

Mr. J. D. Wenger, Alberta and Belden, returned last Monday evening after a motor trip to Melfort, Sask., Prince Albert National Park, and Wainwright Park. They were accompanied on the trip from Melfort by Mr. O. J. Wenger and family of Melfort and Mr. and Mrs. F. C. Hunt and family of Alto, Mich., who are spending a holiday in Canada. Three days were pleasantly spent at Waskiesau Lake in the P.A. National Park, after which the three families returned to Melfort. Mr. and Mrs. Hunt and family who accompanied Mr. J. D. Wenger and family to Oyen via Wainwright, left this morning for Yellowstone National Park, en route to their home in Michigan.

Mr. and Mrs. E. Borg of Sundale were visited last Saturday night by a surprise party numbering about 50 people. By pre-arrangement the guests met at the home of Mr. Carl Olson at about 8:30 p.m. and afterwards left for the Borg home in ten cars. The evening was pleasantly spent in dancing till midnight - when refreshments were served.

During the absence of Mr. George Morrison, who is away on a vacation, the drug store is in charge of Mr. A. Hamm of Rosthern, Sask.

Grand dance in Oyen Theatre on Wednesday, August 11. Oyen orchestra.

Mr. and Mrs. S. A. Miller and son Bert left last Sunday for Calgary by motor, to spend a few days in the city.

Mr. and Mrs. G. A. Morrison and daughter Margaret and Miss Bennett, left yesterday to spend a vacation at Banff, Lake Louise and other mountain points.

Navy League Does Valuable Work

Fred Cooke, provincial organizer of the Navy League of Canada, who has been in Oyen collecting subscriptions to the Sailor Magazine, wishes to thank the citizens for their assistance to the Alberta division. The Navy League of Canada assists the widows and orphans of the Merchant Marine. The league also supports the sailors' homes and institutes etc. in all the larger Canadian ports from coast to coast, and looks after the welfare of the seaman when ashore. In addition to this, the league trains young men and boys, helping to make better Canadian citizens of them.

The Sailor Magazine is fast becoming one of the leading Canadian magazines and it should be in every home and institution in Canada.

Subscriptions to the Sailor Magazine and renewals, as well as donations for the Navy League, can be sent to V. J. Ward, Secretary-Treasurer, whose address is 314-6th Ave. N.E., Calgary, Alta., who will issue receipt.

IN LIGHTER VEIN

A fire which started in an Ohio coal mine forty-five years ago is reported to be still burning. We wish our coal dealer would deliver stuff like that - Punch.

Since prohibition came into existence; the old corner filling stations have been replaced by the new corner filling stations.

All Saint's Anglican Church, Oyen, Alta., Aug. 11
11th Sunday After Trinity
Sunday School 1:45 p.m.
Evangelism and Sermon 3 p.m.
Rev. Leonard O. Scott.

Alex. R. McTavish, Registered Optometrist will make his regular visit to the Hotel, in Oyen, on Thursday, August 15. Complete dependable eyeglass service at reasonable prices.

Miss Catherine Wright and Miss Glouanna Desmond, returned to Oyen last Monday after spending a week in Calgary.

A surprise party was paid to Mr. and Mrs. Pete Ulfvick of Cappon district, last Thursday night, when a pleasant time was spent by all concerned.

Miss Ina Anderson left last week to visit her Uncle and Aunt, Mr. and Mrs. Alex. Moore at Didsbury, Alta.

Mr. William Hogan left last Monday for Calgary.

Miss Muriel May spent the weekend visiting at the home of Mr. and Mrs. Robert McCullum.

In another column subscribers are asked to look at their address labels and if same shows the subscription to be in arrears, they are asked to cooperate with the News by a prompt remittance.

Mr. Gordon Caswell and children left last Friday en route to Calgary, Red Deer and Buffalo Lake.

Mr. Fred Radlax, motored to Calgary last Friday on a business trip. He is expected home the latter part of this week.

Cutting of wheat has started on some farms near Acadia Valley. It is expected however, that harvest operations will not be general until the latter part of next week.

Mr. and Mrs. George Langmuir and family, Mr. and Mrs. A. Wade, and Mr. P. H. Hall, who have been spending a holiday at Buffalo Lake, returned to Oyen last night. They report having a very pleasant time.
